

GEN WEALTH

Crypto for Generational Wealth!

Introduction

Gen Wealth brings the Binance Smart Chain investors a truly unique tokenomic structure where diamond hands are truly rewarded for simply holding. The longer you hold, the more you earn.

Crypto for Generational Wealth

We have built this with one goal in mind, that's to reward diamond hand holders. The concept is simple, buy and hold, and benefit from sellers getting rekt.

30% BUSD Rewards

Our Holders benefit from 30% transaction fees in BUSD. Hold and Earn

10% Locked Liquidity

10% of each transaction back into the Locked Liquidity Pool to strengthen the value.

20% Staking Pool

Staking capability will launch mid Feb 22, allowing investors to stake their tokens and earn even more.

10% Burn

10% of each transaction is burnt, making it a deflationary token and ultimately reducing supply / increasing value.

Tokenomics

Our taxes will remain simple. 5% on all Buys and 30% on all Sell transactions. This is how our Diamond Hands get rewarded and sellers get rekt. This can help us sustain a good budget for development, marketing and a healthy LP.

- Ecosystem / Team & Marketing wallet locked

Core Team

We are a team of individuals with vast knowledge and experience in solidity and project innovation. We are all crypto traders at heart who have been in the space for many years already. Due to the fact that some of us hold positions at some very important companies we will dox ourselves publicly to the community once we reach 10m market cap.

GenWealth Roadmap

After launch we will be continuously improving and evolving our project to give the best possible experience for our holders and provide a steady flow of innovation that keeps investors engaged with the Gen Wealth project into the long term. Our product at launch demonstrates the ground floor for our project, a proof of concept and quality that our team will strive to maintain and build on throughout each stage of our roadmap.
